Re: HB 2601

Dear Education Committee Members,

PLEASE support Representative Hubert's bill, HB 2601.

My family loves our city and my kids love their school. It breaks my heart to think about having to leave KS because the government is going to try to enforce how I take care of MY child. Both of my children are unvaccinated and are the healthiest kids I know.

I work each week in the children's ministry in one of our local churches. It's sad to me to see how in a class of 30 children that at least 20% of those are non-verbal, have allergies, and other chronic health problems. That is NOT normal and is not how things used to be.

I stand firm and will NOT inject my children with the toxins and terrible things that are in vaccines. I will leave Kansas before that happens.

Sincerely,
Ashley Westmoreland

Paola, KS
