Re: HB 2601

Dear Education Committee Members,

I am writing to you to ask you to support Representative Huebert's bill HB2601.

I am against any vaccine mandates and against letting a corrupt, pharma funded agency like the KDHE have any say in them.

Mandating vaccines violates the religious freedoms that I am guaranteed in the United States of America.

I have never been vaccinated and I will not vaccinate my children. My wife has spent 20 years trying to overcome vaccine injuries and I will not allow that to happen to our children after seeing all she's had to go through.

Our first baby is due any day now and we will homebirth to avoid the coercion and threats at the hospital.

Our midwife is for CHOICE and informs us with every item that we need to make decisions on and allows us to research and choose what we want to do, this doesn't happen in other medical settings.

We fully believe in informed consent which doctors nor nurses give you regarding vaccines and that's shameful. They only instill fear and while we are educated and make decisions based out of knowledge not fear, others aren't and don't know any better and look to them to be their guide.

We need to have choice not coercion. We need to hold vaccine manufacturers liable. We need guarantees that our children are not going to be injured or killed. But we don't have that and where there's risk there must be choice

Please consider supporting Representative Huebert's bill HB2601.

Sincerely,

Miken Wohler
Olathe, KS
