Re: HB 2601

Dear Education Committee Members,

I am a Kansas citizen, and mother to three young children, writing in support of the bill HB 2601.

It has been clear that the KDHE has used inappropriate authority in regards to vaccines being added to the schedule without following the proper procedure. As a mother of three small, almost school aged children, this is frightening to me and should absolutely be a concern to our elected officials.

It is imperative, for the sake of the preservation of medical freedom, that this bill be considered and passed.
