Re: HB 2601

Dear Education Committee Members,

Our rights as US citizens and native Kansans are being threatened with a push for mandatory vaccinations. While we fully support anyone wishing to vaccinate, vaccines are not safe for everyone. In our family's case, the immune compromised. Moreover, this should be a choice for the individual and their doctors.

Please honor the the rights and religious freedoms of your fellow Kansans and support Representatives Steve Huebert's bill, HB2601.
