

I personally think it's stupid to do a vape ban on flavors except menthol. Vaping saved my life. I smoked for years and it affected my asthma. I started vaping to get away from smoking. Vaping was not only a better taste due to the flavors but it helped get all the tar out of my lungs. At least everything in vape I can name can you do that in cigarettes? Vaping ingredients are natural can you say that about cigarettes? The answer you probably have was no. If you want to shut something down shut down the house juice that is not sterile. Let premium juice be. Least it's made in a safe clean regulated lab. Vote for no vape ban!!!!!!!!!!!!!!
