

Hello, my name is Rachel Godfrey. I live in a small town called Parker, Kansas. When I was 18 years old I started smoking combustible cigarettes and I smoked for 7 years. My daughter developed asthma and cigarette smoke would trigger asthma attacks. My husband and I knew we had to quit smoking for the health of our daughter. We tried several methods to quit smoking including cold turkey, the nicotine patch, nicotine gum, and doctor prescribed Chantix. After the side effects Chantix caused we were at a loss. That is when we were introduced to vaping. My husband and I started out using 24mg nicotine fruity flavored vape liquid. Over the course of 6 years we worked our nicotine level down. My husband now uses a 3mg nicotine liquid and I use nicotine free liquid. We feel healthier and our daughter hasn't had an asthma attack in years. Now I work in a vape shop in Paola, Kansas and enjoy helping other people switch to a healthier alternative. I am a Kansas resident, a voter, and I OPPOSE House Bill 2563 Section 12(w). Thank you for your time. #IVapeIVote
