

To the point on HB 2563, by Eric Cope, Owner Top Shelf Vapors, 785 438-7441

This bill will be a close of business bill for vape manufactures, vape distributors and Vape shops in Kansas

This bill will FORCE people back into smoking cigarettes again

This bill will cause teens to smoke cigarettes again

This bill will end my passion of helping thousands of Kansan's quit smoking cigarettes

This bill will cause a force to be reckoned with on election day. Myself and others will remember who forced them to close their businesses and forced them back into smoking cigarettes on election day.

Some questions

You need to ask Cui Bono (who benefits) from this bill....(tobacco industry)

Is it appropriate for tobacco companies use of public government to get rid of their competitors?

It is simply to understand why vape businesses will close

A business trades products for dollars

When all products are taken away except one product, it makes it impossible to have enough customers to remain open for business.

95-99%+ of Vaper's use flavored vape products to quit smoking cigarettes and to stay off cigarettes

Falsities

Nicotine Vape products have been falsely associated with the illicit Marijuana Oil Illnesses & Deaths

Vaping is as bad or worse than combustible cigarettes

Vaping has given rise to teens who didn't use cigarettes previously

Truths

Again & Again the same response is heard from those quitting combustible cigarettes using vapor products. They are able to breathe better, smell better, taste better, sleep better & have more energy. These health improvements wouldn't occur if vaping was harmful like combustible cigarettes

500,000 people die each and every year because of combustible cigarettes and this bill will increase that number by sending people back to smoking combustible cigarettes

Flavors are absolutely necessary to help adults quit smoking and stay off of cigarettes
