

Please do whatever you can to expand Medicaid. I have a 4 year old grandson who was diagnosed at 2 with a seizure disorder and who depends on CHIP as do his siblings. The disorder affected his development and he has needed much medical attention and therapy. There was concern that the program would not be reauthorized a few years ago but thankfully there was a positive result as CHIP was reauthorized for several years.

There are many other people whose health care depends on the actions of the state. You must do what you can to expand Medicaid.
