

HB2336

Proponent Testimony

Please consider two conservation initiatives you will vote on in the coming days. The first is HB 2336 which will help to convict poachers that shoot at decoys used by conservation officers. As a landowner that had deer poached on my property this year with the antlers sawn off and the remaining part of the carcass left for waste, I would like to see law enforcement have the tools needed to prosecute these game thieves. **Please support HB 2336**

Thank You!
