Chair: Rep. Steve Huebert

Thank you Mr. Chair and members of the committee for allowing me to speak today. The grossest violation is to use good people, who truly care, to promote misguided 'government solutions' and when the final solution is applied and the foundational principles of our country are forgotten, our posterity will end.

The following proposed language will help avoid 'systems of solution' used, as it relates to the possible unintended consequences of allowing "other school-based mental health professionals" to, 'medically diagnose' children in school. Passing this bill as written, could speed up the already hyper diagnostic inflation of mental health and substance use disorders, as defined in the DSM-V, the use of psychotropic medication in children and the further government fortified and taxpayer funded, intrusion into the American way of life, our families, our communities, and our individuality.

Thank you.
