

## WRITTEN TESTIMONY ONLY

February 17, 2022

PROPONENT of HB 2498

Madam Chair Landwehr and the House Committee on Health and Human Services:

**The COVID-19 vaccine should never be mandated, especially for our children.** The safety of these vaccines has not been tested for long term adverse effects, and we are already seeing many vaccine injuries.

Just this week, pathology reports were published on two teen boys that were found dead in their beds 3-4 days following their 2<sup>nd</sup> dose of the Pfizer vaccine. The pathology report indicated the deaths were due to vaccine induced myocarditis.

A 13 year old Michigan boy dies in his sleep three days after getting the 2<sup>nd</sup> dose of the Pfizer vaccine.

Please protect the children. Do not allow the Secretary of Health or anyone else, implement a mandate on our children.

Sincerely,

Sheri Graham  
Moundridge, McPherson County, KS  
House District #74
