PROPONENT of HB 2498

Breana Wendel
Lansing, Kansas
Leavenworth County
House District 40

Madam Chair Landwehr and the House Committee on Health and Human Services:

Please accept this letter in support of HB 2498. Medical decisions should strictly be between the patient and their medical provider(s). The government, at any level, should not mandate any type of medical intervention or procedure, including vaccines.

I urge you to move this bill forward in the process and work towards prohibiting the secretary of health and environment from requiring a COVID-19 vaccine for children who attend school or daycare facilities in our state.
