

## Written Testimony Only

PROPONENT of HB 2498

February 18, 2022

Madam Chair Landwehr and the House Committee on Health and Human Services:

No, the secretary of health and environment should not have the ability to require the COVID-19 vaccination of children in daycares and schools. If such a requirement is ever put in place, I believe there will be a withdrawal from those institutions that you won't believe. I know people who have had the vaccines themselves that say they won't have it given to their children.
