SB 388  
Written Testimony

Dear Senator Hilderbrand,

I'm in favor of SB 388 with amendments made to address the following:

- limit the use of mail-in ballots to use by overseas deployed military members or by people that are disabled that are physically unable to vote in person
- require a mail-in ballot to be notarized
- require that signature verification *shall* be performed and compared to an on-file signature for the ballot to be valid

Outstanding questions I have from the proposed bill which I believe needs clarification:

- Section 1(d), what constitutes proper authorization to sign for another person? How is that documented and how can it be enforced?
- Section 1(g), how is chain of custody tracked/documentated if a person delivers their ballot to a county election officer by personal delivery?
