Re: SB 104

Thank you for the opportunity to testify on behalf of SB104. My name is Shawn Brandmahl. It is my objective to ensure that when a youth is placed outside of the home, that it becomes mandatory for a judge to place a 'no run' order on a youth. Currently, judges are not doing so because a youth cannot be held in detention and youth tend to run numerous times before they become eligible for secure care.

When SB 367 was passed, it had a detrimental effect on secure care due to the fact that CINC youth could no longer be held in detention pending placement. Current legislation requires that a youth may run twice before being allowed in secure care. This was not a problem when CINC youth could be held in detention pending placement. However, when the youth are sentenced to secure care they tend to run from authorities at the first opportunity. When a youth is on the run, he/she is often difficult to locate, oftentimes for several months which puts the youths safety at risk. During this time, the youth is not in school, not receiving necessary services and may be subject to exploitation. When a youth is allowed to run twice, the youth falls even further behind in school and in receiving necessary treatment.

Our objective is to provide needed services to youth who are falling behind and not receiving proper supervision and training to be successful in society before they turn 18. When youth are on the run for long periods of time, they fall behind, making it difficult for them to catch up with their peers. The services that we provide are far more beneficial to the youth than the lessons that they learn 'on the street.'

It is our hope that this committee will support the upgrade to this statute to ensure that at risk youth are receiving the services that they need.

Thank you for your attention to this matter,

Shawn Brandmahl
