Re: In Support of SB 212

Chairman Hilderbrand and Senate Public Health and Welfare Committee Members,

Please vote in favor of SB 212. Kansas residents should have the freedom to make the best informed medical decision for their child/children and themselves. We don't force people to give kidneys or take vitamins, so why should we force anyone to get vaccines that are not 100% safe or 100% effective. Medical should be between a patient and their doctor. The government should not control what we do to our bodies. Everyone is entitled to make the best health choices for themselves and their children.

Sincerely,
Brooke Hamilton
Topeka, Kansas
Shawnee County
Senate District 20
