In support of SB 212

Chairman Hilderbrand and Senate Public Health and Welfare Committee Members,

I am asking that public health officials please pass SB 212. It is paramount that we stop adding mandated vaccines to the vaccine schedule. I have watched and witnessed kids get hurt from this current vaccine schedule. I have been watching this process unfold for 20 years. Kids who follow the current vaccine schedule have so many health problems. You can tell as early as 1 1/2 - 2 years of age. I am going to tell you about a very close friend of mine, what has happened to her kids. She has 5 kids, all have followed the vaccine schedule including the recommended flu shots. Her youngest child who is 2 1/2, is a happy child, but he is very under developed for his age, he can barely talk, he is short and has small growth stature for his age, has sleeping problems, just to name a few. Three of her older kids ranging from 14-10 all have to take growth hormones and ADD, ADHD issues, her middle boy is definitely on the spectrum, with depression, sleeping disorders, over sensitive to texture with foods, sensitive to tags on shirts etc. Her second grader still can't articulate and pronounce words correctly. I have been researching vaccines for 20 years and you can't make a vaccine safe!! We have to stop this insanity of mandating so many vaccines! My cousins, and so many of my close friends have at least one child who is autistic and they know it is from vaccine injury, and no one will listen to them, including their pediatrician. Growing up from kindergarten all the way thru college, I didn't know one person who or kid who had ADD, ADHD, neurological sensory disorders, anxiety, depression, transgender issues. These disorders do not run in my family or extended family including my cousins and second cousins etc. And now my second cousins kids are getting these issues. So genetics isn't the cause. If genetics were the cause, then my parents and grandparents would have had these same issues. So the only thing that has changed in my family's life and my best friends life is how soon we vaccinate and the number of vaccines that have been mandated from the time they are born until they are 18. The number of mandatory vaccines have increased 300% since the 90's. One in 36 kids have autism now, where 1 in 200 was the case 10 years ago. The CDC,NIH,NIHAIID all refuse to investigate this issue. As long as this childhood pandemic of autism, won't be investigated, then it is PARAMOUNT that we stop mandating more vaccines!! I have so much more to say, and much more detail I would like to add in this letter about the vaccines injuries of my family and friends. But I am keeping it short and to the point. One last point, the friends and families I know who have autistic children are wealthy people. But I will say this, it has put them in a financial disaster now because it costs so much to care for kids with vaccine injuries! Please please stop mandating and adding more vaccines to the vaccine schedule!

Thank You for listening!

Germaine Buck
