In support of SB 212

Chairman Hilderbrand and Members of the Senate Public Health and Welfare Committee,

Please support SB 212. It is a God-given right for parents and guardians to make health decisions for their children under the age of 18 years old. Support the freedom and rights of our families to make their own healthcare decisions! Take the power to mandate healthcare decisions from one government official.

Sincerely,

Jessica Naputi  
Wichita, KS
