HB 2793, proponent, written testimony only

House Committee on Health and Human Services

Respected Chair Landwehr and Committee Members,

I am a proponent of HB 2793. Healthcare providers should never be able to perform healthcare services on minors without parental consent. This is one of those subjects that seems so obvious that it's appalling to think we need an official BILL to keep it from happening.

Parents have rights and children need protection. Their parents are there for that very purpose.

Thank you for conducting this hearing and I ask that you pass this bill out of committee favorably.

Most sincerely,

Jill O'Connor
