

February 14, 2024
HB2793 PROPONENT
Oral or Written Testimony (Depending on time allotted)
House Committee on Health and Human Services

Dear Chairwoman Landwehr and Committee Members,

I'm a father and grandfather and lifelong resident of Kansas.

It is absolutely insane that we find ourselves today actually needing laws to protect our children from government overreach and to have to reaffirm the rights of the parents or legal guardians of minors. Parents or legal guardians of minors have to give consent for any healthcare services.

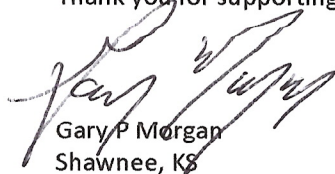

In the process of evaluating all testimony today always ask yourself... "who does the proponent/opponent represent and why do they hold the position they do?" In most all cases the opponents are representing organizations that do not stand up for the rights and freedoms of the parents and have embraced other financial interests to carry the positions they do!

What is wrong with our Topeka legislators these last few years? Do they not have children or grandchildren? Or are they living in false FEAR created by our health institutions that reflect so well the orchestrated narrative of our corrupt Federal and State agencies such as the CDC or NIHID or KDHE? How can anyone stand back and let the State administer any healthcare practices or procedures on OUR children without the full knowledge and CONSENT of the parents or legal guardians? Is this the United States of America? Is this really Kansas? Are we stooping to the level of a Communist/Marxist government?

Committee members this is an absolute no-brainer! Take the special interests out of the equation! To do anything less only implicates each of you as having your own special interests. Stand up for the rights of parents in protecting THEIR children. This isn't the CCP! This is the United States of America. Its about time Topeka started representing "We the People" instead of these paid lobbyists who couldn't give a darn about the true health and welfare of OUR CHILDREN!

Please move this important bill forward with a strong message of support!

Thank you for supporting this bill.
