**Testimony to House Transportation Committee**  
**In Support of HB2499**  
January 23, 2024

Chairman Francis and Committee Members,

Our associations support HB2499. The bill expands the limited restriction on utilizing a cell phone while operating a motor vehicle to include three critical areas of public safety concerns—drivers under age 18, school zones during reduced speed times, and construction zones while workers are present.

Failing to give full time/attention to driving was the top contributor to Kansas traffic crashes in 2021. This was a contributing circumstance in at least 18% of all crashes.<sup>1</sup> We know that even when cell phone use is the distraction, either with phone calls or texting, it is not always identified in crashes. Investigations to confirm cell phone use, beyond the admission by the driver, are generally only completed in cases of death or life-threatening injury due to the extensive investigative work and time involved.

In 2019, 1405 crashes occurred in work zones, about one every 6.2 hours, resulting in 7 deaths and 437 injuries. In 2020, 1281 crashes occurred in work zones, about one every 6.8 hours, resulting in 2 deaths and 412 injuries. In 2021, 1237 crashes occurred in work zones, about one every 7.1 hours, resulting in 8 deaths and 385 injuries.<sup>2</sup>

School zone accident data was not readily available.

**Kansas Statewide Distracted Driving Crashes 2016-2021 Summary**

	CRASHES				PEOPLE	
	Total	Fatal	Injury	PDO*	Deaths	Injuries
<b>Mobil Phone</b>	3713	47	1194	458	47	1646
<b>Other Electronic Devices</b>	1103	3	359	741	3	471
<b>Other Distractions</b>	8096	32	2295	5769	33	3339
<b>All distractions</b>	12,912	82	3848	6968	83	5446

**Note mobile phone distractions account for 57% of all distracted driving fatalities.**

In a 2015 National Survey,<sup>4</sup> 15.3% of the respondents indicated they answer phone calls they receive while driving “always” or “almost always.” Another 26.8% said they sometimes answer while driving. And 56.2% of those answering phone calls while driving said they continue to drive throughout the conversation.

That same survey found 8.2% of the respondents say they “always” or “almost always” make phone calls while driving, with 25.4% saying they “sometimes” make calls while driving. 32.9% of those making calls while driving scroll through saved numbers to dial and 28.8% said they manually dial when making calls.
