**Good Morning**

**Chairman McGinn**

**Members of the Senate Local Government Committee**

**Mid America Pipe is a pipe manufacturing company that supplies pipe for water treatment and sewage plants across the United States. We are highly dependent on electricity for production. Our electric rates have risen multiple times in the last couple of years.**

**I truly appreciate this committee addressing eminent domain on land and making it a local issue. If this is not take care of it will only raise our rates faster.**
