

Dear Legislators,

I am writing to urge you all to vote in favor of SB6. The entire Covid debacle taught us that we MUST restrict the authority and powers of unelected officials, such as the KDHE secretary, and the secretary of health and environment. These folks took away many of our basic human rights, guaranteed in the Constitution, under the guise of public safety. We now see the lockdowns were actually harmful and did nothing to protect people, and instead it ruined the economy and caused economic hardship. These folks acted without considering all the ramifications of their drastic and draconian measures.

SB 6 will allow us to move forward with foresight, to insure individuals will not be needlessly quarantined and removed from their homes. Legislators will not be protected from this type of invasive activity either. It's time to not only protect the citizens of Kansas, but yourselves as well. We are all being played by a greedy pharmaceutical run world, that only looks for "useful idiots" to support their agenda.

In the name of liberty,

Kathryn Andries
