

**TESTIMONY IN SUPPORT OF STADIUM STAR BONDS BILL
TO THE
JOINT MEETING OF THE SENATE COMMERCE AND
HOUSE COMMERCE, LABOR, AND ECONOMIC DEVELOPMENT COMMITTEES
JUNE 17, 2024**

Chair Erickson, Chair Tarwater and Honorable Members of the Senate and House Commerce Committees, thank you for the opportunity to appear before you today in favor of the proposed legislation for stadium STAR bonds.

Many of us in this room grew up watching the Chiefs and Royals with our dads and grandpas. And then cheered with our sons, daughters and grandchildren as the Royals became champions again and the Chiefs ignited a white-hot dynasty that is still rewriting the record books. For generations, Kansans have embraced the players and coaches - their wins, their losses and their national championships - as our own. The risk that the Kansas City Chiefs and Kansas City Royals – our Chiefs and Royals – could be lured away by other states, is a risk that Kansans have resoundingly said they do not want to take. The legislation before you today seizes a once-in-a-lifetime opportunity to protect a Midwest tradition and recruit a major franchise to Kansas.

I represent Scoop and Score, Inc., a not-for-profit formed to engage in public policy advocacy, research and education, including grassroots lobbying in support of economically prosperous and responsible legislation. This includes the STAR Bonds legislation before you, which gives Kansas a seat at the table when it comes to securing a permanent home for the Kansas City Chiefs and delivering new economic growth for our state.

STAR Bonds are the right financing tool for building major new attractions.

STAR bonds are a significant tool in Kansas' economic development toolkit. They were designed to help develop large-scale commercial, entertainment and tourism projects – and for nearly two decades have given Kansas a leg up in attracting major investments to our state. STAR bonds are special obligation bonds paid only from the incremental growth in sales tax and use taxes within the STAR bonds area.

STAR bonds were used to build the Kansas Speedway, Children's Mercy Park, and the Village West Legends complex, one of the most successful economic development projects in our state's history, and the closest comparison to the proposed use of STAR bonds to attract a professional major sports team to Kansas. Those attractions bring thousands of visitors to our state, put Kansas in front of a national audience multiple times a year, and have created thousands of jobs and billions in investment.

With the failure of the Jackson County, Missouri stadium sales tax issue earlier this year, Kansas has been presented with an opportunity to retain these major league assets in our region. Attracting a major league sports team to Kansas is exactly the type of project STAR bonds were made for.

This bill strengthens the STAR bonds tool to attract major league teams to Kansas.

A good carpenter knows that no one tool is right for every job. He may pick one based on its form or function and may customize his toolbox to ensure quality work. So too the tool of STAR bonds can be customized to fit the job at hand. This legislation enhances STAR bonds to fit the job of attracting the Chiefs and/or Royals to stay in our region.

The bill creates a new class of project to attract professional sports teams, allowing the financing of up to 75% of the project, and a repayment term of 30 years for a project with a minimum 30,000 seat stadium and \$1,000,000,000 or more in capital investment. This use is limited to one year, with a second year only if approved by the Legislative Coordinating Council, and may be used for no more than two projects.

STAR bonds issued under this bill would use the new sales tax, alcohol taxes, and money in the already formed Attracting Professional Sports Teams fund of the lottery to repay bonds issued by a city, county, or Kansas Development Finance Authority and purchased on the bond market by private investors.

STAR bonds are different than most municipal bonds. They are a special obligation bond, meaning they are not a debt of the city, county, or state. They are not backed by the taxing authority of the government, and they are not debts of the government. The only money that can be used to pay them are those revenues generated through sales.

The bill contains strict guardrails to ensure the wise use of stadium STAR bonds.

With great power comes great responsibility. The strengthening of the STAR bonds financing tool, as outlined in this bill, created added guardrails to ensure the decision to use STAR bonds is in the best interest of Kansans and financially prudent for local governments and investors. This includes a series of four safeguards, requiring a project to pass the scrutiny of the Department of Commerce, nonpartisan economists, the legislature and the private market.

- When a developer brings a stadium STAR bonds proposal to the Department of Commerce it must be vetted internally and a project plan developed demonstrating how the project will work.
- The project plan is vetted by an outside economist who issues a feasibility study to the Department.
- The Legislative Coordinating Council reviews the development agreement negotiated between the Department of Commerce and the developer based on the plan and feasibility study. The LCC can approve it, reject it, or send it back for modification.
- If approved, the free market in the form of bond buyers will determine whether they believe the project makes sense and is worthy of their investment.

If, and only if, a project can pass all of these safeguards, will a stadium STAR bond project happen.

The policy decision before the legislature is whether to add this tool to the toolkit.

Others have attempted to sow confusion about what this bill is and is not, and to delve into details that mislead from the policy decision that is before this committee and the legislature. The legislature has always decided what financing incentives are available to the Department of Commerce. The Department then decides the details of how to use those tools in response to inquiries from developers and negotiates the specifics of the deal along with local governments.

The use of stadium STAR bonds would follow that traditional path with one notable exception, approval of the development agreement by the LCC. While the full legislature has the policy decision to add the tool to the toolkit, the LCC will put legislators in a position to vet the actual use of the tool and sign off on the details of any stadium STAR bond project. It is this new, additional oversight that will review the details of the project, scrutinize the funding mix, review the proformas, and ensure that the interests of Kansas taxpayers are protected.

Kansas is and should be the home of champions.

Kansans have always been visionaries, focused on economic growth and the future. They started families, homes, and cities. They embraced economic development and sought incentives to lure railroads to carry cattle and crops to markets across the country. They took wing with the aviation industry. They built farms, ranches, businesses, highways, and universities because they knew that growing was the path to prosperity and that turning their back on the future was the road to stagnation and ruin.

Today, our region and our state face a choice. Are we still looking to grow, to develop, to prosper? Or, are we content to sit on the sidelines and watch major league investment leave our area? Kansas was built by people with winning aspirations, people who reached for the stars. With the passage of this bill we can continue that legacy and prove that Kansas is – and will continue to be - a home to champions.

We thank you for your thoughtful consideration of this bill and encourage your recommendation of its passage.

I have attached three documents for your further consideration. The first is polling information showing that a clear majority of Kansans support the legislature taking action to keep the Chiefs and Royals in our area. The second a list of more than 9,000 Kansans who have signed a petition pledging their support. The third is a document that clarifies some of the misinformation being spread about STAR bonds and their use in Kansas.

Respectfully submitted,

Dan Murray,
on behalf of Scoop & Score, Inc.

RE: Kansas STAR Bond Proposal

The Kansas Legislature has been presented with a once-in-a-lifetime opportunity to ensure the Super Bowl Champion Kansas City Chiefs remain in the region for generations to come while also opening the door to luring Super Bowls, Final Fours, and other major sporting events to Kansas City that would be game-changers for the state and region economically. The proposal before the Legislature to secure that opportunity has widespread support.

Voters in Jackson County, Missouri, recently voted against a proposal that would have funded improvements to the Kansas City Chiefs' Arrowhead Stadium. The Kansas City Chiefs are now looking to secure their home in the region for generations to come. The Kansas Legislature is considering a proposal that would bring them to Kansas and keep them in the area. Do you support the Kansas City Chiefs leaving Missouri and moving to Kansas?	Yes	63%
	No	20%
	Unsure	16%

Key Findings:

- Support across the state is strong for bringing the Chiefs to Kansas
 - *63% of respondents favor bringing the Chiefs to the Kansas side to keep the team in the region for generations to come*
- Nearly 60% of Kansans favor using STAR Bonds to secure this opportunity
- 37% of voters stated they would be less likely to vote for their state legislator if they voted against the proposal to make Kansas and the region the permanent home of the Chiefs

Kansas City Chiefs Proposal:

Overall, two-thirds of Kansans support bringing the Chiefs to Kansas, showcasing widespread approval among all political parties and demographics. This consensus is rarely found, highlighting the unifying potential of bringing the Chiefs to Kansas.

Support for the use of the state's Sales Tax and Revenue (STAR) Bonds to facilitate the move without any new cost to Kansas taxpayers is high, with 57% of voters in favor. Furthermore, this plan has bipartisan support, being favored by nearly two-thirds of Republican primary voters and a majority of Independents.

Respondents are overwhelmingly more likely to support the proposal after being informed the ramifications of rejecting the proposal could include losing the Kansas City Chiefs in the region. Furthermore, political consequences for legislators who oppose the proposal are evident. One-third of voters indicate they would be less likely to support their legislator for re-election this November if they voted against this proposal. This sentiment appears even stronger for Republican primary voters, with 40% indicating they would be less likely to support their legislator in November.

Conclusion:

The Kansas Legislature's proposal to use STAR Bonds to secure the Kansas City region as the home of Chiefs by bringing them to the Kansas side has robust support across the entire state and particular approval among GOP primary voters and Independents. Considering the high stakes involved, this proposal will be a crucial issue for voters heading into the 2024 election.

Methodology:

The statewide survey, which comprised 1,006 likely general election voters, was conducted from May 13 to May 15, 2024, using landline phone interviews and mobile text surveys. It is balanced by the age, gender, education level, registered party, and DMA of the true voting population and has a margin of error of +/-3.09%.

FUMBLE vs. FACTS

FUMBLE: “A study has shown only 3 of the 16 STAR Bond projects are solvent.”

FACT: False. 15 of the 16 STAR bond projects cited in that study are solvent. The study was not about solvency of projects. It was initiated to count how many people from outside of Kansas visited STAR bonds projects. As the scope of the study outlined, “We evaluated 16 STAR bond attractions to estimate how well they drew visitors.”¹

There are varying sizes of STAR Bond projects across the state. It is patently misleading for someone to compare local projects like a museum in Derby to a regional project like the Kansas Speedway or the proposed Chiefs project. Undoubtedly, an NFL or MLB stadium project will generate more visitors and more revenues than the smaller local projects that also benefit from STAR bonds.

The closest comparison to the Chiefs proposal is the Speedway in Wyandotte County, which is the most successful STAR Bond development in the state’s history. Sporting KC has expanded on this success story and billions of dollars of additional private investment is currently under construction, making this area the most successful economic engine in the State of Kansas.

FUMBLE: “The Overland Park Prairiefire STAR Bond Project was bailed out by taxpayers.”

FACT: False. While the Prairiefire project did not meet its goals, taxpayers were not on the hook for that. That responsibility rests solely with the investors in that project. As is specifically stated on the STAR bond documents for that project: “STAR Bonds and interest shall not be deemed to constitute a debt or liability of the Issuer, the State or of any political subdivision ... but shall be payable solely from the Trust Estate. The issuance of the STAR Bonds shall not ... obligate the Issuer, the State or any political subdivision thereof to levy any form of taxation or make any appropriation for their payment.” The “trust estate” referenced in the agreement means the sales tax generated by the project.²

“Overland Park did not guarantee the debt on the Prairiefire project, meaning its taxpayers aren’t on the hook.”³

STAR Bonds were not designed for every project. They were designed to bring major economic development and job creation into our state. As Alan Cobb, President and CEO of the Kansas Chamber of Commerce, recently said in the news: “This is a once in a lifetime opportunity for Kansas. The state’s STAR bond economic development tool was designed precisely for this type of high-traffic attraction.”⁴

FUMBLE: “Kansas taxpayers will be on the hook in the event of a default.”

FACT: False. STAR bonds do not count against a local government’s debt limit and do not affect its bond rating because the sales tax revenue pledged is what is obligated to pay the bonds. If that revenue is insufficient, the city, county or state is not on the hook to pay the bonds and therefore their credit rating is not affected.⁶

Platte County, Missouri, has been falsely cited as a cautionary tale, but Missouri does not have a STAR bond program. Platte County refused to pay bonds issued by a third-party development agency for parking garages and the county won in court. Special obligation bonds, like the STAR bonds we have in Kansas, are secured solely by the specific revenues pledged toward repayment (which in the case of the Chiefs project, would be the sales tax revenues generated by the project). And unlike Missouri, Kansas law requires that they know that before they invest, protecting Kansas issuers’ credit ratings.⁷ For example Overland Park has retained its AAA, the highest bond rating even after the Prairiefire project.⁸

FUMBLE: “Kansas law allows local governments to pledge their city’s full faith and credit to repay STAR Bonds.”

FACT: This provision applies only to the City of Topeka’s Heartland Park project. It gave the city the option to issue “full faith and credit bonds” (general obligation bonds) if they wished in completion of this project, but it did not require the city to do so.⁹

Kansas law does not provide the option for local governments to issue general obligation bonds on any other STAR Bond project, including the proposed professional sports STAR bond projects. Instead, the investors (the bond buyers) bear the risk and that is noted on the face of the bonds.¹⁰

FUMBLE: “Local governments may need to keep property and sales tax rates elevated - or hike them even higher - to account for infrastructure needs relating to the STAR Bond project.”

FACT: : False. Local governments are not required to participate in the development, thereby not impacting local taxpayers. Under the law, the developer must utilize STAR bond proceeds to pay for or reimburse eligible costs for the development.

No local government will lose existing tax revenue under the STAR bonds proposal. In fact, quite the opposite is true. Local governments will see increased revenues to offset services and keep the burden off current taxpayers. The Village West Legends project in KCK is one example. The STAR bonds for this project were paid off five years early, created 5,700 jobs in over 100 businesses, and the project has been an incredible boost for the local, regional and state economy.¹¹
